■ Test Execution Report

Total Tests: 8
■ Passed: 5
■ Failed: 3
■ Execution Time: 18 seconds

■ Passed Tests

tests/test_auth.py::test_register_user
tests/test_auth.py::test_login_user
tests/test_get_sweets.py::test_get_sweets_authenticated
tests/test_inventory.py::test_purchase_sweet
tests/test_inventory_restock.py::test_restock_sweet

■ Failed Tests

tests/test_delete_sweet.py::test_delete_sweet	The test attempted to delete a sweet and expected a **404 Not Found** after verifying deletion. However, the API returned **405 Method Not Allowed**. Cause: Only admin users are authorized to delete sweets. This test used a normal user without admin privileges.
tests/test_search_sweet.py::test_search_sweets	The test attempted to search sweets and expected **200 OK**. However, the API returned **401 Unauthorized**. Cause: The search endpoint requires user authentication, but the test assumed it was public. A valid JWT token is required.
tests/test_sweets.py::test_create_sweet	The test attempted to create a sweet and expected **200 OK**. However, the API returned **400 Bad Request**. Cause: Duplicate sweet creation is not allowed. The API enforces uniqueness on sweet names, so creating the same sweet twice fails. Admins should restock instead of re-creating the same sweet.
